🪪 Profile

Experienced Software Developer adept at full-stack development with a focus on creating scalable applications to drive business growth and enhance user experiences. 3+years of hands-on experience in designing, developing, and deploying innovative software solutions.

💼 Professional Experience

Software Developer, Alphaloop IT PVT LTD   January 2024 – present | Udaipur, India

- Designed and developed user-friendly websites.
- Trained over staff members in internal web functions, including steps on how to independently make minor updates and changes.
- Fixed bugs from existing websites and implemented enhancements that significantly improved web functionality and speed.
- Developed dynamic and interactive websites that ensured high traffic, page views, and user experience, resulting in a 40% increase in sales revenue.
- Effectively communicate with clients on a daily basis to understand their needs and provide updates on project progress.
- Utilize strong problem-solving skills to address client concerns and deliver solutions that exceed expectations.

Software Developer, Arcgate   June 2022 – August 2023 | Udaipur, India

- Designed and implemented responsive and intuitive user interfaces using Javascript, HTML, CSS, resulting in improved user engagement and satisfaction.
- Collaborated with cross-functional teams to gather and analyze requirements, ensuring alignment with business objectives and technical feasibility.
- Developed RESTful APIs utilizing Node.js, enabling seamless communication between front-end and back-end components.
- Actively participated in code reviews, providing constructive feedback and adhering to coding standards to improve code quality across the team.
- Maintained open and effective communication with clients on a daily basis to discuss project requirements, milestones, and any potential issues.
- Demonstrated excellent teamwork and interpersonal skills by fostering positive relationships with team members and clients alike.

Software Developer,   February 2018 – February 2019
Bounce (Wickedride Adventure Services Pvt Ltd.)   Bangalor, India

CRUD Operations with "Manage Oops"

- Implement proper database design to efficiently store bike data and related information.
- Apply user authentication to ensure authorized access to CRUD operations.

Software Trainee, Gempluse Infotech PVT LTD   May 2015 – August 2015 | jaipur

- Development: Assist in coding, testing, and debugging PHP applications under the guidance of senior developers.
- Learning: Actively learn and implement best practices in PHP development, staying up-to-date with emerging trends and technologies.

🎓 Education

Bachelor of Technology (Computer Science), Rajasthan Technical University, Kota

August 2012 – 2016 | Jaipur, India

🧠 Skills

MongoDB, Express.js, React.js, Node.js, Authentication/Authorization (JWT, OAuth), ORM/ODM (Sequelize, Mongoose), WebSockets, HTML5, CSS3, JavaScript, Git, CI/CD Pipelines (HTML5 │ CSS3 │ JavaScript │ Version Control with GitExperience with Agile/Scrum methodologies)

📁 Projects

Real-Time Chat Application (MERN Stack)
- Developed a real-time chat application using the MERN stack (MongoDB, Express.js, React.js, Node.js), enabling instant messaging between users.
- Implemented WebSocket communication for real-time messaging, allowing users to see each other's messages as they are typed.
- Designed the user interface with React components and styled with CSS, ensuring a responsive and intuitive chat experience.

Web Scraping Using JavaScript
Roles and Responsibilities:
- Researched and identified target websites for data extraction.
- Utilized JavaScript along with libraries like Cheerio or Underscore.js to parse HTML structure and locate relevant data elements.
- Implemented scripts to scrape and extract desired information in real-time, ensuring up-to-date data retrieval.
- Handled asynchronous requests and pagination to navigate through multiple pages in real-time if necessary.

E-commerce Platform (React.js, Node.js, MongoDB)
Key Features:
- Developed a fully functional e-commerce platform using React.js for the frontend and Node.js with MongoDB for the backend.
- Implemented real-time updates for product availability, ensuring that users see accurate stock information as it changes.
- Utilized Redux for real-time state management and JWT for secure authentication, providing seamless user experiences with instant feedback.

Hotel Management Software (MERN Stack)
Roles and Responsibilities:
Developed a hotel management software using the MERN stack (MongoDB, Express.js, React.js, Node.js), featuring real-time updates for room availability and reservations.
Key features include real-time room reservations, guest management, staff management, billing, and reporting.
Implemented user authentication and real-time updates for room inventory management and reservation system, ensuring smooth operations and instant updates for users.

✒️ Declaration

I, PrahladChandra, solemnly affirm that the information provided in this curriculum vitae is accurate and complete to the best of my knowledge.
